You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Issue including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or any other risks that are not currently known or are currently deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or any part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our Restated Consolidated Financial Information prepared in accordance with Ind AS and the Companies Act and restated in accordance with the SEBI (ICDR) Regulations. To obtain a better understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 87, “Industry Overview” beginning on page 81 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 191 respectively, of this Draft Prospectus as well as other financial information contained herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviation” beginning on page 2 of this Draft Prospectus.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;*
- Some events may have material impact qualitatively instead of quantitatively; and*
- Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

In this Draft Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Maks Energy Solutions India Limited.

INTERNAL RISK FACTORS:

- 1. There are certain outstanding legal proceedings pending against our Company, Promoter and Directors. Any adverse outcome in any of these proceedings may adversely affect the financials and reputation of the respective Promoter / Director which may in turn have an adverse effect on our business.***

Our Company, Promoter and Directors are currently involved in certain tax proceedings in India which are pending at different levels of adjudication before the concerned authority/ forum. We cannot assure you that these tax proceedings will be decided in favour of our Company, Promoter or Directors, as the case may be. Any adverse decision in such proceedings may render us liable to penalties and may have a material adverse effect on the financials and reputation of our Company/ Promoter/ Directors which may in turn have an adverse effect on our business. Additionally, during the course of our business we are subject to risk of litigation in relation to contractual obligations, employment and labour law related, personal injury, damage to property, etc.

A classification of these outstanding proceedings is given in the following table:

| Sr. No. | Nature of Cases | No. of outstanding cases | Amount to the extent quantifiable (in Lakhs)* |
|---------|-------------------------------|--------------------------|---|
| 4. | Pending against our Company | 1 | 1.88 |
| 5. | Pending against our Directors | 15 | 8.12 |
| 6. | Pending against our Promoter | 2 | Not ascertainable |

**The amounts mentioned above may be subject to additional interest/ penalties being levied by the concerned authorities for delay in making payment or otherwise. The amount of interest/penalties, that may be levied is unascertainable as on the date of this Draft Prospectus.*

For further details pertaining to outstanding litigations, kindly refer to the chapter titled “*Outstanding Litigations and Material Developments*” beginning on page 203 of this Draft Prospectus.

- 2. The global pandemic of COVID-19 has impacted the revenue of our operations in a negative manner. The continuing effect of the pandemic on our business and operations is highly uncertain and cannot be predicted.***

Since December 2019, there is an ongoing outbreak of the 2019 novel coronavirus (“COVID-19”) which has affected countries globally. On January 30, 2020, the World Health Organization declared the COVID-19 outbreak a “Public Health Emergency of International Concern” and on March 11, 2020, it was declared a pandemic. Between January 30, 2020 and the date of this Draft Prospectus, the COVID-19 disease has spread to many other countries, with the number of reported cases and related deaths increasing daily and, in many countries, exponentially.

There were border controls, lockdowns and travel restrictions imposed by various countries, including India, as a result of the COVID-19 outbreak. Several countries’ governments and numerous companies have imposed increasingly stringent restrictions to avoid or slow down the spreading of COVID-19. Such outbreak of an infectious disease together with these restrictions and measures have resulted in protracted volatility in domestic and international markets and/ or may result in a global recession and may adversely impact our operations, revenues, cashflows and profitability. In particular, the COVID-19 outbreak has impacted global economic activity.

A number of governments have revised gross domestic product growth forecasts for 2022 downwards in response to the economic slowdown caused by the spread of COVID-19 and it is possible that the

outbreak of COVID-19 may cause a prolonged global economic crisis or recession.

A countrywide lockdown to contain the spread of COVID-19 has been in force in India since March 24, 2020, which was further extended with phase-wise relaxations. and many other economic activities have remained largely suspended like complete stoppage of movement of non-essential goods and restricted movement of people and thus delaying and hampering our operations. As a result, we may face delays associated with collection of payments from our clients, due to such lockdown or economic slowdown caused by COVID-19, which may adversely affect our cashflows.

Due to the lock-down imposed on account of COVID-19, the financial performance of our Company was highly impacted during the first half of the FY 2020-21 in comparison to the previous financial year. Our revenue from operations has decreased and trade receivables has increased. There is no assurance of timely recovery of these receivables or any recovery at all. The impact on account of COVID-19 cannot however be assessed with certainty on the overall financial performance and profitability of our Company.

As of the date of this Draft Prospectus, there is significant uncertainty relating to the severity of the near and long-term adverse impact of the COVID-19 pandemic on the global economy, global financial markets and the Indian economy. We are unable to accurately predict the duration or scope of the COVID-19 pandemic or the near or long-term impact of the COVID-19 pandemic on our business. To the extent the COVID-19 pandemic adversely affects our business and financial results, it may also have the effect of heightening many of the other risks described in this Draft Prospectus, including those relating to cash flows.

We cannot assure the prospective investors that such events will not occur in the future or that our business, financial condition, results of operations and cash flows will not be adversely affected by such events.

3. Our Company has reported certain negative cash flows in the past and it is possible that we may experience negative cash flows in the future.

Our Company has reported certain negative cash flows from its operating and investing activities in the previous years and as per the Restated Consolidated Financial Statements which are summarized as under:

| Particulars | (Rs. in Lakhs) | | |
|---|------------------------------|----------|----------|
| | For the Year Ended March 31, | | |
| | 2021 | 2020 | 2019 |
| Net cash flow from operating activities | 73.19 | (326.27) | (129.10) |
| Net cash flow from investing activities | 32.27 | 3.46 | (282.36) |
| Net cash flow from financing activities | (7.68) | 230.14 | 541.64 |

For details, please refer to the chapters titled “Financial Statement and Other Financial Information as Restated” and “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company” on pages 136 and 191 of this Draft Prospectus.

Cash flows of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operation.

4. *Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.*

Our business requires high amounts of working capital and we rely on our lenders for availing the working capital facilities. If these facilities are withdrawn at any point of time by our lenders, it may lead to major impact or temporary disturbances in our operations. Further, the operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the prospective demands and credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to bad debts or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or to pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our sales level and thus adversely impacting our business performance.

5. *The tenure of one of our working capital facilities has expired. Any delay or failure to renew these facilities may lead to their withdrawal which may adversely affect the business operations and financial position of our Company.*

The Company has availed the working capital facilities from ICICI Bank amounting to Rs. 2,000 Lakhs and Tata Capital Financials Services Limited amounting to Rs. 300 Lakhs. As per the terms of the respective sanction letters, the working capital limits are required to be renewed within 12 months of the date of sanction.

The term of the working capital facilities sanctioned by Tata Financials Services Limited has expired on May 6, 2020. The Company had initiated the process for seeking renewal / revision of the said facilities, however the said process was not completed till the date of filing the Draft Prospectus. We are dependent on working capital facilities to meet our funding requirements and any failure to obtain renewed/ revised sanction letters or such new facilities from other lender(s) in timely manner, may adversely affect our liquidity position, business operations and financial position of our Company.

6. *We have a high debt equity ratio.*

Our business activities are working capital intensive. As on March 31, 2021, we have taken working capital funding of about Rs. 1,770.66 Lakhs and our total debt to equity ratio stands increased to 1.59 from 1.40 as on March 31, 2020. Our capacity to service these debts depends on our continued profitability and availability of liquid assets. In case we are unable to achieve the desired growth, due to internal constraints or external factors like adverse developments in the industry, we may find it difficult to service the debt and this may affect our credit rating, profitability and growth adversely.

7. *We are required to comply with certain restrictive covenants under our financing agreements. Any non-compliance may lead to, amongst others, accelerated repayment schedule and suspension of further drawdowns, which may adversely affect our business, results of operations and financial conditions.*

Some of the financing arrangements entered into by us include conditions that require us to obtain respective lenders' consent prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such loan and the conditions negotiated under each financing agreement.

A failure to observe the covenants under our financing arrangements or to obtain necessary waivers may lead to the termination of our credit facilities, acceleration of amounts due under such facilities and suspension of further access/ withdrawals, either in whole or in part, for the use of the facility. Pursuant to clauses in certain financing agreements, any defaults under such facilities may also trigger cross default or cross acceleration provisions under our other financing agreements. If the obligations under any of our financing documents are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our long-term working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing.

8. *We are subject to risks arising from interest rate fluctuations, which could adversely affect our results of operations, planned expenditures and cash flows.*

The working capital facilities and other borrowings availed by us are subject to repayment with interest. If the interest rates of our existing or future borrowings increase significantly, our cost of funds will increase. Any further increase in interest rates may have an adverse effect on our results of operations and financial condition. While we could consider refinancing the loan or hedging interest rate risks in appropriate cases, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks. Further, if such arrangements do not protect us adequately against interest rate risks, they would result in higher costs.

9. *Our assembling unit which we have taken on lease from third party, is not on commercial land and if the same does not get converted into commercial land, we may be required to vacate the premises and relocate our assembling unit at some other place or may require to pay penalties which may impact our financial condition and operations.*

Our assembling unit situated at S. No. 13/6/1/3, Yeolewadi, Kondhwa- Saswad Road, Kondhwa, Pune - 411048, Maharashtra, India, which is not on commercial land. As per the applicable provisions of Maharashtra Land Revenue Code, 1966, such land should not be used for any commercial / industrial purposes without conversion of such land into non-agricultural land. We cannot assure you that there will be no action or no penalties will be levied by the concerned authorities for using this land for commercial purposes. Any such action may have an adverse impact on the financial performance of our Company. Moreover, in the event of such enforcement action, we may also be required to vacate the above premises and identify alternative premises and may need to incur the cost of shifting our operation, which may have an adverse impact on our business and operations which may, in turn, impact financial condition of our Company.

10. *Our Company has made substantial investments in its overseas Joint Venture. We cannot assure that this investment will generate expected return to us.*

We have executed a Joint Venture Agreement dated April 1, 2018 with RoseMary Industries Limited (RoseMary), a company incorporated under the laws of Republic of Nigeria, Africa for investing in Relion Power Industries Limited ("**Relion**") a 50-50 joint venture company in Republic of Nigeria,

Africa. Our Company has invested an aggregate sum of Rs. 4095.95 Lakhs in Relion, whose value as on March 31, 2021 stands at Rs. 252.99 Lakhs. As per the Auditor's report, we have ceased to have control over the joint venture operation due to its non-viability of economic operation and other long term restrictions in the generator market of Republic of Nigeria. We cannot assure that our investment in the overseas Joint Venture will be generate us positive return to us in near future, or at all.

11. Our Statutory Auditor has given his qualification on certain matters in the Standalone and Consolidated Audited Financial Statements as at March 31, 2020 which may affect our future financial results.

Our Statutory Auditor has given his qualification in reports on the Audited Financial Statements of our Company as at March 31, 2020, stating our failure to maintain the quantitative records of the Inventory. The impact of such limitation on valuation of closing and opening stocks could not be quantified. Our continuous failure to maintain such quantitative records may lead to wrong valuation of inventory of our Company.

12. Some of our Group Companies and Promoter Group members are engaged in the line of business which is same or similar to that of our Company. There are no non-compete agreements between our Company and such entities. We cannot assure that our Promoter and Promoter Group members will not favour the interests of such entities over our interest or that the said entities will not expand which may increase our competition and may adversely affect business operations and financial condition of our Company.

Some of our Group Companies and Promoter Group members are engaged in same or similar line of business as that of our Company. We have not entered into any non- compete agreement with such entities. We cannot assure that our Promoter/ Promoter Group who has common interest in such entities will not favour the interest of such entities. As a result, conflicts of interests may arise on account of common suppliers/ customers and in allocating business opportunities amongst our Company and such entities in circumstances where our respective interests diverge. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. We cannot assure you that these or other conflicts of interest, in the event such conflicts arise, will be resolved in an impartial manner.

13. A significant portion of our revenues is dependent on the export sales. Any adverse changes in the conditions affecting these markets could adversely affect our business, results of operations and financial condition. Moreover, we are exposed to possibilities of loss of products in transportation, change in import-export policies, foreign currency exchange rate fluctuations and exchange control risks, which may adversely affect our results of operations.

A significant portion of our revenues is dependent on export of diesel generator sets to Middle East, South East Asia and Africa. In the event of a slowdown in these regions, or any developments that make our products less attractive in these regions, we may experience more pronounced effects on our business, results of operations, and financial condition than if we had further diversified sales across different geographical locations. Our business, results of operations and financial condition have been and will continue to be largely dependent on the prevailing conditions affecting grid-generated electricity and the resulting market for diesel generator sets in these regions.

Subsequently, our business is subject to diverse and dynamic economic, regulatory, social and political conditions in the jurisdictions in which we operate. Operating in international markets exposes us to a number of risks globally, including, without limitation:

- Compliance with local laws and regulations (including imposition of non-tariff barriers), which can be onerous and costly as the magnitude and complexity of, and continual amendments to, those laws and regulations are difficult to predict and the liabilities, costs, obligations and requirements associated with these laws and regulations can be substantial;
- Security, and unexpected changes in laws, regulatory requirements and enforcement;
- Challenges caused by distance, language and cultural differences;
- Difficulties with local operating and market conditions, particularly regarding customs, taxation and labour;
- Potential damage to our brand and reputation due to non-compliance with local laws;
- Currency exchange rate fluctuations;
- Difficulty in recovering trade receivables;
- Inadequate local infrastructure;
- Competition from local players in the segment; and
- Economic and financial conditions, including the stability of credit markets, foreign currency fluctuations and controls, particularly the ability to repatriate funds to India and other countries.

To the extent that our operations are affected by unexpected and adverse economic, regulatory and social and political conditions in the countries in which we operate, we may experience operational disruptions, loss of assets and personnel and other indirect losses that could materially and adversely affect our business, financial condition and results of operations.

- 14. *We are dependent on a few external suppliers for key raw materials and components. The failure of our suppliers to deliver these raw materials or components in the necessary quantities, to adhere to delivery schedules or to meet specified quality standards or technical specifications, could adversely affect our production processes and our ability to deliver orders on time.***

We source key raw materials and components such as engines, alternators, controllers and metal sheets from external suppliers. The quality of our products and customer acceptance of our products depends on the quality of raw materials and components and our ability to deliver our products in a timely manner. The failure of our suppliers to deliver these raw materials or components in the necessary quantities, to adhere to delivery schedules or to meet specified quality standards or technical specifications, could adversely affect our production processes and our ability to deliver orders on time. In addition, if any of our suppliers' experience any financial distress or bankruptcy, this may cause disruption in our supply chain. If such events take place, we may be unable to meet our desired level of quantity or quality, which may give rise to contractual penalties or liability for failure to perform contracts, which we may not be able to recover from our suppliers. We may also lose customers and suffer damage to our reputation. Any of the above could adversely affect our results of operations.

Further, if the costs of raw materials and components were to rise due to factors such as rises in input and commodity prices, shortages in supply or unilateral price increases by our suppliers, and we are unable to recover these costs through cost saving measures elsewhere or by increasing the prices of our products, our results of operations could be adversely affected. In the event that prices of these raw materials and components subsequently decline, we cannot assure you that we will be able to revise the price of our products downwards.

- 15. *We require certain approvals and licenses in the ordinary course of business and the failure to obtain or retain or comply with the conditions of such approvals or licenses in a timely manner or at all may adversely affect our business, results of operations and financial condition.***

We require certain approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we either may have made, or are in the process of making, an application for obtaining the approval for its renewal. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, our business may be adversely affected. Furthermore, our government approvals and licenses are subject to numerous conditions, some of which may require us to make ongoing compliance-related expenditure. If we fail to comply or a regulator claims that we have not complied with these conditions including any compliances, if any, related to the Factories Act, 1948, our business, results of operations and financial condition may be adversely affected. Further, we may not have obtained some of the requisite approvals or be in compliance with the requirements. For instance, the notification on 'Noise limits for generator sets run with diesel' issued by the Central Pollution Control Board, as amended from time-to-time, requires that certificates of Type Approval and Conformity of Production should be obtained annually for all DG Sets under the capacity of 1000 KVA manufactured, assembled or imported in India. Our Company has not obtained such certificates for the DG Sets assembled by us. Further, the Maharashtra Pollution Control Board has issued the revised Direction dated March 7, 2016 regarding classification of industries into Red, Orange, Green and White category wherein the DG Sets of more than 1 MVA and up to 5 MVA fall under Orange industry. We may have assembled the DG Sets above the capacity of 1MVA but have not complied with regulations applicable to the industries falling under Orange category. Moreover, we have not filed any returns or made any compliances in relation to the GSTN 24AAGCM6693L1ZW granted to us for the state of Gujarat. We cannot assure you that no adverse action would be taken against us by the regulators or that we will not be required to pay fines or penalties for such non-compliance. Any such action may adversely affect our business, results of operations and financial condition.

16. *Compliance with and changes in laws and regulations may adversely affect our business, results of operations and financial condition.*

Our assembling activities are subject to Indian laws and government regulations on safety, health and environmental protection. These laws and regulations impose controls on the storage, handling, discharge and disposal of chemicals, as well as work conditions, and other aspects of our operations and products. Safety, health and environmental laws and regulations in India, in particular, have been increasing in stringency and it is possible that they will become significantly more stringent in the future. The costs of complying with these requirements could be significant. We have incurred, and expect to continue to incur, operating costs to comply with such laws and regulations. In addition, we expect to make capital expenditures on an ongoing basis to comply with safety, health and environmental laws and regulations. The discharge of hazardous substances or other pollutants into the air, soil or water may cause us to be liable to the Government or to third parties. In addition, we may be required to incur costs to remedy the damage caused by such discharges or pay fines or other penalties for non-compliance.

We cannot assure you that we will not become involved in future litigation or other proceedings or be held responsible in any such future litigation or proceedings relating to safety, health and environmental matters in the future, the costs of which could be material. Clean-up and remediation costs and related litigation could adversely affect our business, results of operations and financial condition.

17. *Adoption, implementation and enforcement of increasingly stringent emission standards could adversely affect our business, results of operations and financial condition.*

Our engine and generator set suppliers are subject to statutory and regulatory requirements governing emission and noise, including standards imposed by various regulatory agencies. Developing engines and components to meet numerous changing government regulatory requirements, with different

implementation timelines and emission requirements, makes developing engines efficiently for multiple markets complicated and could result in substantial additional costs that may be difficult for such suppliers to recover in certain markets. In some cases, they may be required to develop new products to comply with new regulations, particularly those relating to air emissions. Increased public and political awareness of the environmental impact of diesel generator sets might also affect preferences in sources of back-up power. Because of these and other factors, our suppliers may scale down or cease production of certain products, resulting in our inability to supply our customers and adversely affecting our business, results of operations and financial condition.

Further, stricter standards on emissions and noises from generator sets may be imposed which may require our suppliers to modify the engines and generator sets that they supply to us, and delays in these modifications, or a decision to cease supply to us altogether, could lead to disruptions in the supply of our products and could adversely affect our business, results of operations and financial condition. For example, in 2014, the Government of India introduced new emissions norms (CPCB II) which aim to reduce pollutants released from diesel generator sets by 50%. The implementation of such norms resulted in an increase in the price of diesel generator sets by about 15% to 20% across the country. This resulted in a sudden decline in diesel generator sets sales during the financial year 2015. (*Source: TechSci Report*) In addition, in October 2017, the Delhi Pollution Control Committee, New Delhi banned the operation of electricity generator sets run on diesel, petrol or kerosene, subject to certain exceptions. The ban was subsequently lifted with effect from March 1, 2018. The imposition of such bans in the future in the geographical areas in which we operate may adversely affect our business, results of operations and financial condition.

18. We use the  "trademark of our Promoter and are exposed to the risk that the "MAKS GROUP" trademark may be affected by events beyond our control and that our Promoter may prevent us from using it in the future.

We do not own the "MAKS GROUP" name, brand or trademark. The "MAKS GROUP" name, brand and trademark, as well as the associated logo as displayed in some of our products and business correspondences are owned by our Promoter which are registered under the Trademarks Act, 1999 under classes 9, 11 and 41 and applied (but not registered) under classes 7 and 12. We currently use the logo pursuant to a license agreement entered into between us and our Promoter, under which our Promoter has granted to us the exclusive and irrevocable right to use the name, brand and trademark "MAKS GROUP" under classes 7, 9, 11, 12 and 41 and the associated logo in consideration for our payment of royalty fees to our Promoter. This license agreement is valid for 5 years i.e., upto March 4, 2025. There can be no assurance that our Promoter will renew the agreement after its expiry. If this license is not renewed or is pre-terminated by our Promoter, we would be required to change our brand, which could require us to establish new branding and name recognition in the market, which could result in a material adverse effect on our reputation, business, financial condition and results of operations.

In addition, there can be no assurance that our Promoter's trademark "MAKS GROUP" will not be adversely affected in the future by events or actions that are beyond our control, including customers' complaints, or adverse publicity. Any damage to the "MAKS GROUP" brand, if not immediately and sufficiently remedied, could have an adverse effect on our business, financial condition and results of operations.

19. Our Company does not own the trademark  "for the logo representing our products. In case the same is not applied for registration, it may affect our business and brand reputation.

The registration of the trademark “” which is being used on the products that we are selling as on the date of filing of this Draft Prospectus, is not applied for. It may be possible that the trademark registration continues to not be applied for or applied but not approved or use of similar/ same name by third parties, may cause the validity or scope of the application to be challenged. In such situations, there may not be a strong recourse to legal proceedings to protect the trademark which could have an adverse effect on our business and/or reputation. In such a scenario, we may also be required to invest significant resources in developing new brands or logos, which could materially and adversely affect our business, financial condition, results of operations and prospects.

20. There have been certain instances of non-compliances, including with respect to certain regulatory filings for corporate actions taken by our Company in the past. Consequently, we may be subject to regulatory actions and penalties, if any, for any such non-compliance and our business, financial condition and reputation may be adversely affected.

There have been certain instances of lapses such as delays, non-filing and factual errors in our corporate records, in relation to certain corporate actions taken by our Company in the past. We have also sought extension of time from regulatory and statutory authorities in the past, in relation to certain filings and compliances, and waiver of late submission fee for delayed filings. Further, certain corporate records of our Company are not traceable. This may subject us to regulatory actions and/ or penalties which may adversely affect our business, financial condition and reputation. For instance, there have been the following instances of delays and non-compliances in relation to regulatory filings/ compliances:

- (i) Form 2 which was filed with the RoC for the Rights Issue dated March 28, 2012 contained wrong Board Resolution and list of allottees as attachment to the form. Rectified form PAS-3 was filed on September 13, 2019. However, form GNL-1, to mark the previous Form 2 as ‘defective’, was not filed.
- (ii) Pursuant to the Rights Issue dated March 31, 2018, form MGT-14 was erroneously filed with wrong resolution.
- (iii) Forms DIR-12 filed for regularization of appointment of the Directors Mr. Ketan Shah, Mr. Rahul Kadam, Mr. Rahul Dingreja and Mr. Eshanya Gupta wrongly mentioned the date of original appointment as date in change of designation of the Directors.
- (iv) We may not have challans for some of the forms filed by the Company with the RoC, in particular, those filed before 2017.

21. We have applied but yet to receive consents from our lenders to the Issue and any delay or failure to obtain the same before filing of Prospectus may cause delay of the Issue.

The Company has availed the working capital facilities from ICICI Bank amounting to Rs. 2,000 Lakhs and Tata Capital Financials Services Limited amounting to Rs. 300 Lakhs. As per the financing agreements with our lenders, we may require to take consents from our lenders before listing the Company’s shares on the stock exchange(s). We have received the consent from ICICI Bank and are in process of obtaining the same from Tata Capital Financials Services Limited. However, we cannot assure you that the same shall be obtained, in time or at all. Any failure or delay in obtaining these consents in due time may lead to delay this Issue.

22. We are highly dependent on our management team and certain key personnel, and the loss of any key team member may adversely affect our business and results of operations.

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. While we believe we have an experienced team, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. Competition for qualified personnel with relevant industry expertise in India is intense and the loss of the services of our key personnel may adversely affect our business and results of operations.

23. *We may incur costs and liabilities due to product liability claims.*

We face an inherent business risk of exposure to product liability or recall claims in the event that our products fail to perform as expected or such failure results in bodily injury or property damage or both. Product liability claims can be expensive to defend and can divert the attention of management and other personnel for long periods, regardless of the ultimate outcome. An unsuccessful product liability defense could have an adverse effect on our financial condition and results of operations. Currently we do not maintain any product liability insurance coverage. In addition, we believe our business depends on the brand reputation that we have developed. If our reputation is damaged on account of product liability claim(s), we may face difficulty in maintaining our market share and pricing with respect to some of our products, which would reduce our sales and profitability.

24. *Demand for our generator sets is significantly dependent upon major power outage events, seasonality and other events beyond our control that can lead to substantial variations in, and uncertainties regarding, our financial results from period to period.*

Sales of our generator sets are subject to consumer buying patterns, and demand for our products is affected by failures in power infrastructure and/or inadequacy of power infrastructure, that may or may not be weather driven, including storms or prolonged summers, or because of blackouts caused by grid reliability issues. Sustained periods without major power disruptions can lead to reduced consumer awareness of the benefits of our generator products and can result in reduced sales and excess inventory. In addition, there is an increased amount of investment in the power sector in India, which has led to the implementation of a number of power plants of varying resources. The demand for our products may decrease as these power plants become operational and India experiences surplus power. Also, the demand for generator sets may be affected by the underlying price of their respective fuels, and any unfavourable movements in prices may adversely affect our business and results of operations.

25. *Some members of the Promoter Group of our Company have consented to disclose only their names, relationship with our Promoter and other regulatory confirmations. No other detail, information, confirmation or approval has been provided by them.*

Mrs. Kalpana Shivhare, Mr. Ramswaroop Shivhare Mr. Aakash Shivhare, Mr. Nikunj Shivhare and Mrs. Shweta Gupta have consented to include only their names as member of Promoter Group. They have denied any kind of association with our Promoter and investment, financial transaction or intent to have any financial transaction or make any investment in our business. They have further denied to provide any information, whether personal or business related in relation to the requirements of due diligence as per the SEBI (ICDR) Regulations.

- 26. *Our insurance coverage may not adequately protect us against all events and the policies do not cover all risks. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.***

Our business could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. We maintain combined fire and burglary policy which provides insurance cover against loss or damage by fire, earthquake, theft etc. and also, which we believe, is in accordance with customary industry practices. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. Further, with respect to the insurances maintained by us, we cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

- 27. *Members of our Promoter group will continue to retain majority control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval.***

Upon completion of this Issue, members of the Promoter group will have substantial shareholding of our post-Issue equity share capital. As a result, the Promoter group will have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter group may have interests that are adverse to the interests of our other shareholders and may take positions with which we or our other shareholders do not agree.

- 28. *Certain agreements may be inadequately stamped or may not have been registered or may not have necessary disclosure as a result of which our operations may be adversely affected.***

Few of our agreements such as those relating to immovable properties, may not be stamped adequately or registered or may not have the necessary disclosures. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration of documents required to be registered, is that such document will not have any effect on the property or be eligible to be received as evidence in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

- 29. *Our Company has entered into related party transactions in the past and may continue to enter into***

related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company has entered into certain related party transactions with our Promoters, Promoter Group and Group Companies in the past. For details, please refer to the chapter title “*Financial Statement and Other Financial Information as Restated*” on page 136 of this Draft Prospectus. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with unrelated parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have any adverse effect on our financial condition and results of operation.

- 30. *Some of the information disclosed in this Draft Prospectus is based on information from industry sources and publications which may be based on projections, forecasts and assumptions that may prove to be incorrect. Investors should not place undue reliance on or base their investment decision on this information.***

The information disclosed in the “Industry Overview” section of this Draft Prospectus is based on information from publicly available industry related information, Government and research information, publications and websites and has not been verified by us independently and we do not make any representation as to the accuracy of the information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Accordingly, investors should not place undue reliance on, or base their investment decision on this information.

- 31. *Our business may be affected by our ability to anticipate and respond to technological advances, new standards and changing consumer preferences.***

Our business may be affected by change in technology or consumer needs. Our ability or our suppliers’ ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth. There can be no assurance that we/ our suppliers will be able to keep pace with the technological advances that may be necessary for us/ them to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect the demand for our products. Any failure to forecast correctly and/ or meet the changing demands may have an adverse effect on our business, profitability and growth prospects.

- 32. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

External Risk Factors

- 33. *The occurrence of natural or man-made disasters including global outbreak of an infectious disease such as COVID-19 or any other serious public health concerns in India or elsewhere may adversely affect our business, financial condition, results of operations and cash flows.***

The occurrence of natural disasters, including hurricanes, floods, tsunamis, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative and would depend on numerous factors. In addition, an outbreak of a communicable disease in India or in the regions in which we have business would adversely affect our business and financial conditions and the result of operations.

The outbreak of a pandemic or an infectious disease in India or elsewhere or any other serious public health concern, around the world could have a negative impact on economies, financial markets and business activities worldwide which in turn could have a material adverse effect on our business, financial condition and results of operations.

- 34. *Financial instability in other countries, particularly countries with emerging markets, could disrupt Indian markets and our business and cause the trading price of the Equity Shares to decrease.***

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and in the Indian economy. Any worldwide financial instability could also have a negative effect on the Indian economy. Accordingly, any significant financial disruption could have an adverse effect on our business, financial condition and results of operations.

- 35. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Our Restated Financial Statements presented in this Draft Prospectus have been prepared in accordance with the Indian GAAP and restated in accordance with the SEBI (ICDR) Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian GAAP and the SEBI (ICDR) Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

- 36. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.***

The regulatory and policy environment in India is evolving and subject to change. Such changes in

applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operations, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes. For instance, in November 2016, the Government of India demonetized certain high-value denominations of currency. Trading and retail businesses in India were impacted for a limited period of time on account of such demonetization. Such businesses have subsequently needed to introduce additional point of sale instruments to improve their collection process. The Government of India implemented a comprehensive national goods and services tax (“GST”) regime that combines taxes and levies by the central and state governments into a unified rate structure from July 1, 2017, which we believe will result in fundamental changes to India’s third-party logistics industry. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

37. *Civil unrest, acts of violence including terrorism or war involving India or other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other countries or other acts of violence, including civil unrest including acts of terrorism or similar events that are beyond our control, could have a material adverse effect on the Indian and/ or global economies and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade and the global equity markets generally. Such events could also potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India's economy.

India has witnessed civil disturbance in recent years and it is possible that future civil unrest as well as other social, economic and political events in India could have a negative impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

38. *Political instability and significant changes in Government policy could adversely affect economic conditions in India generally and our business in particular.*

Changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments in and affecting India may have an adverse effect on our results of operations.

India has a mixed economy with a large public sector and an extensively regulated private sector. The role of the Government and that of the state governments in the Indian economy and their effect on producers, consumers, service providers and regulators has remained significant over the years. Both state and central governments have, in the past, among other things, imposed controls on the prices of

a broad range of goods and services, restricted the ability of businesses to expand existing capacity and reduce the number of their employees and determined the allocation to businesses of raw materials and foreign exchange. Since 1991, successive Governments have pursued policies of economic liberalization, including significantly relaxing restrictions in the private sector. Nevertheless, the role of the Government and state governments in the Indian economy as producers, consumers and regulators has remained significant. There can be no assurance that the Government's past liberalization policies or political stability will continue in the future. Elimination or substantial change of such policies or the introduction of policies that negatively affect the security service industry could have an adverse effect on our business. Any significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and our business in particular.

39. *We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the NSE, subject to the receipt of the final listing and trading approvals from the respective Stock Exchanges. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian clients and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our clients, for any reason whatsoever, including rising consumer inflation, availability of financing to our clients, changing governmental policies and a slowdown in economic growth may have an adverse effect on our clients' revenues, savings and could in turn negatively affect their demand for our products. For instance, demonetization of 500 and 1,000 currency notes was announced in November 2016. The immediate impact of the announcement led to people depositing their cash in banks and the Indian economy was drained out of liquid cash for a brief period. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors

of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

40. *The requirements of being a listed company may strain our resources.*

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Equity Listing Agreements with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/ or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

41. *Any downgrading of India's debt rating by an international rating agency could adversely affect our business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

42. *The trading volume and market price of the Equity Shares may be volatile following the Issue.*

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties/ governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;

- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

RISK RELATING TO THE EQUITY SHARES

43. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our Promoters or significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales may occur, including complying with the minimum public shareholding norms applicable to listed companies in India, may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber the Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur, may significantly affect the trading price of the Equity Shares.

44. There are restrictions on daily/ weekly/ monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breaker imposed by Stock Exchange on which the Company is listed, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on different Stock Exchanges. The percentage limit on circuit breakers is set by the Stock Exchange based on the historical volatility in the price and trading volume of the Equity Shares. The Stock Exchange do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and download movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

45. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since, the Issue size is less than ₹10,000 Lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our

financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

46. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price*

The Issue Price of our Equity Shares is Rs 20.00. This price is based on numerous factors (for further information, please refer chapter titled “*Basis for Issue Price*” beginning on page 75 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

47. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, up to an amount of Rs. 1 lakh, if Securities Transaction Tax (“STT”) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the

pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions specified by the RBI, then the prior approval of RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further details, please refer to chapter titled "*Restrictions on Foreign Ownership of Indian Securities*" of this Draft Prospectus.

48. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our ability to pay dividends in the future will depend on a number of factors, including but not limited to the earnings, working capital requirements, contractual obligations, applicable legal restrictions and overall financial condition of our Company. We may decide to retain all of our Company's earnings to finance the development and expansion of our Company's business and therefore, our Company may not declare dividends on the Equity Shares. Any future determination as to the declaration and payment of dividend will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. For details of dividends paid by our Company in the past, please refer to chapter titled "*Dividend Policy*" of this Draft Prospectus.

49. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

50. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of the Equity Shares, independent of our operating results.*

On listing, the Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of the Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of the Equity Shares and returns on the Equity Shares, independent of our operating results.

51. *The price of our Equity Shares may be volatile or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian capital markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

OVERVIEW OF INDIAN ECONOMY

Indian economy continues to be one of the fastest growing economies around the world, despite the two major reforms, namely Goods and Services Tax (GST) and demonetization that deterred the growth rate in the short run. With a policy change such as GST, which is of huge scale, scope and complexity, the transition unsurprisingly encountered challenges of policy, law, and information technology systems, which especially affected the informal sector in the country.

In Financial Year 2020-21 and Financial Year 2021-22, COVID-19 has continued to stalk the earth, imprisoning more than 200 countries in its deadly embrace. It had claimed many lives, halted economic activity globally and extinguished jobs and incomes. COVID-19 has also hit India hard. The global slowdown was marked by a close co-movement in the slumps in industrial production, trade and investment at national levels, given that investment is concentrated in intermediate and capital goods that are heavily traded. In addition, trade tensions dented business sentiment in the manufacturing sector. The weakening of global imports was significantly influenced by the downturn in emerging market economies (EMEs). In turn, these forces reduced export growth, which is intensive in imports, and relies heavily on the state of global supply chains. For a while, as manufacturing lost steam, services held firm and helped to support consumer confidence, but eventually the inexorability of the global downturn took over.

Economic activity in India slowed down in 2019-20 and 2020-21. Monetary and credit conditions reflected deceleration in underlying activity in the economy. Public finances recorded deviations from budgetary targets due to shortfalls in tax revenue and disinvestment collections. The growth of India's real gross domestic product (GDP) had slumped to 4.2 per cent in 2019-20 (6.1 per cent a year ago), the lowest since 2009-10. Due to the onset of second wave of COVID -19, the RBI has revised the projection for real GDP growth to 9.5% in 2021-22 (from earlier of 10.5%).

INDIAN POWER SECTOR

The Indian energy sector has been rapidly evolving and has witnessed several changes in recent times.

The energy sector is undergoing a transforming and disruption and the government has undertaken various programmes such as the Integrated Power Development Scheme and the Deendayal Upadhyaya Gram Jyoti Yojana, and changes are already evident. India has the fifth largest power generation capacity in the world. The country ranks third globally in terms of electricity production.

Electricity demand and supply scenario

Demand supply scenario has improved considerably for most of the states across India. From an era of deficits, the states have moved considerably towards a situation where the average deficit has narrowed down significantly. The country has witnessed a combination of unprecedented coal-based generation capacity additions (led significantly by the private sector) as well as lower than expected demand growth which has led to improvement in the power deficit situation over the years. Factors such as policy clarity, political push as well as administrative reforms have helped in aggressive addition of generation capacities (predominantly coal based) in the recent years. The following table sets forth the power supply position in India:

| Year | Energy | | | | Peak | | | |

The region wise power demand scenario, government policy initiatives, investments made in power markets, availability and constraints of resources, difficulty of obtaining environmental approvals and land clearances, degrading financial health of state distribution utilities and detractors or risks associated with competitive bidding are some factors currently affecting electricity demand in India.

Electricity Consumption

THE DIESEL GENERATORS MARKET IN INDIA

A diesel generator is used to generate electric energy by using a diesel engine with the help of an electric generator. Diesel gensets convert the mechanical energy generated by the diesel engine into electricity using alternators.

India is reportedly the third-largest electricity producer & consumer in the world after the US & China. Around one fourth of the energy generated in India is lost during transmission or stolen. Peak supply falls short & frequent power outages last for hours in many regions of the country. This deficient in power sector and the demand-supply gap in power distribution made growth in domestic backup power market in the last few years. The power backup sector can broadly be categorized into 4 broad segments of UPS, DGs, inverters and batteries. The increase in demand for diesel gensets is due to unreliable power & in some cases, due to the lack of access to grid electricity.

Residential, commercial, infrastructure and industrial sector have used backup power extensively to continue their activities to counter frequent grid shutdown issues. There are various critical end-user industries like hospitals, airports, data centers, manufacturing facilities, water & sewage facilities, etc, require continuous power supply for ensuring seamless operation, apart from call centers, luxury hotels, apartments, etc. Normally, Diesel generator sets are operated only for a short period of time during the day & are used as a back-up power supply.

Over the past decade, India's diesel generators market has witnessed a considerable transformation such as the replacement of mechanical engines with electronically controlled technology for better fuel efficiency, a reduction in toxic gas emissions, the easing of maintenance and faster troubleshooting during breakdowns. India has recently witnessed a significant increase in its economic development, which led to an increase in individual spending and has also aided growth across diverse sectors including the manufacturing, commercial and telecommunication sectors. The manufacturing and commercial sectors were one of the largest end users of diesel generators in India. The diesel generators market in India is expected to grow over the next few years, primarily due to the establishment of industrial parks, petroleum, chemicals and petrochemical investment regions, increasing the emphasis by the government on infrastructure projects such as metro rails, smart cities and the expansion of state and national highways. In addition, growing residential societies and upcoming business complexes are further expected to increase demand for diesel generators in India.

Competition

The DG set market is highly organized & very competitive. Customers prefer quality products. Almost all the large & renowned DG set manufacturers have their production facility in India. The pricing alone would not lead to market share gains for any player in the DG industry. Given that DG sets are primarily used for backup and typically last for 10 years or longer, the decisive factors go beyond price. Brand positioning, dealer network/distribution, service centers, product portfolio, and reliability are some of the key decisive factors. Price is the key criterion for decision making, and therefore, margins are also the lowest in this segment.

Challenges to the Generator set industry in India

The Government of India and the private sector are making large investments in setting up new power plants and improving the transmission and distribution network. This is likely to stabilize grid-generated power and reduce supply outages, thereby reducing the need for back-up sources of power, such as diesel generator sets.

The usage of DG sets to generate power is expensive. While the cost of power produced by renewable sources has declined to around Rs. 3 per unit and the cost of power produced by using coal is around Rs. 4 per unit, the cost of power produced by using DG sets is above Rs. 10 per unit as the global price of crude oil is expected to increase in the future, diesel prices are expected to rise significantly, making diesel-based power generation solutions even more pensive. Consequently, this may impact demand for new diesel generator sets

Technology update in Generator set industry in India

In recent years, research and development (R&D) efforts by manufacturers have been focused on introducing gensets with reduced noise and emission levels, and higher energy efficiency. Today, most manufacturers offer silent DG sets in line with regulatory requirements and consumer demand, especially in the hospitality and healthcare segments.

Also, energy efficient DG sets that offer better fuel efficiency are finding greater demand from consumers. Further, solar-diesel hybrid generator sets and multi-fuel technologies are key emerging options to improve reliability and efficiency, and achieve cost savings. Hybrid power plants combine at least two different sources of energy and may or may not have a storage facility.

In addition, with the growth of smart grid technologies and smart cities, manufacturers have started offering DG sets with remote monitoring capabilities. Consumers can monitor DG set parameters related to fuel consumption, annunciator, alternator and engine, and the loading and switch connection status. Advanced modules can provide additional monitoring and controlling capabilities. Further, the use of analytics and internet of things for monitoring DG sets can immensely help in preventive maintenance and ensure maximum uptime.

OUTLOOK

Globally, power demand is increasing rapidly, while supply is not growing at the same pace, thus creating huge power deficit in many parts of the world. Consequently, the demand for power generation equipment such as diesel generators continues to increase worldwide. Poor power infrastructure & unreliable grid power supply has been largely responsible for increasing frequency of power outages, which is likely to boost the demand for diesel gensets across the globe. Rising demand for mobile diesel gensets & biofuel based diesel gensets is also expected to benefit the diesel genset market. Expanding activity across all segments in the manufacturing sector, construction & infra sectors, & standby power from the residential segment, all add up to generating a robust demand for gensets in India, across all types & capacities. The global market for diesel gensets is largely dominated by the Asia-Pacific region due to rapid urbanization & industrialization, with China & India emerging as the largest revenue contributing countries in the region's diesel genset market.

Europe and North America, the traditional markets for diesel gensets are likely to remain stable and largely unchanged in the next decade. There has been a considerable demand from Asia Pacific and the emerging markets of Africa and South America. In Asia, the focus is on India and China, two countries which are expected to add many power plants thus furthering the need for diesel genset units. The technology improvements in the telecom sector in India are expected to be a major driver for growth of the genset industry. As for Middle East and Africa, power generation using oil & gas is likely to be backed by diesel gensets to prevent grid brownouts.

In terms of exports, Manufacturers are already exporting DG sets from their India facility. This is also required to nullify the effects of poor demand from Indian markets in coming days. The African continent & our neighboring countries, where the power situation is not very good will continue using diesel gensets for their economic activities. There is huge potential for the Indian manufacturers to use their India facility as a manufacturing hub & export DGs to Africa & neighboring countries in Asia. Commenting on the way ahead for the diesel gensets market in India, Growth of the DG market has a good correlation with growth in construction & manufacturing activities in the country.

The World is in a transition phase and energy is central to it. India has been responsible for almost 10% of

the increase in global energy demand since 2000. India's energy demand in this period has almost doubled. Yet the increase in domestic energy production is far below than India's consumption needs. By 2040 more than 40% of primary energy supply will be imported, up from 32% in 2013. Consequently, there is a large latent demand for energy services that needs to be fulfilled in order for people to have reasonable incomes and a decent quality of life.

OUR STRENGTHS

We believe that we possess the following strengths:

- 1. Established operation capability in the diesel generator set market to cater requirements of large and diversified customer base**

Over the years, we have established operational capabilities for assembly of diesel generator sets in India. Our existing assembling facility in India is equipped with required machines and equipment that covers all kinds of necessary tests and standard as required to supply quality products to our customers.

We assemble wide range of diesel generator sets for our customers, with capacities ranging from 15 kVA up to 1250 kVA which cater to requirements of almost all market segments including industrial and corporate end-users from various industries such as service, manufacturing, realty, education, automotive, FMCG, dairy and, hospitality, logistics, pharmaceuticals and information technology.

2. Proven track record

Through our longstanding presence in the diesel generator business led by our experienced Promoter and Directors, we have a track record of assembling and supplying a range of diesel generator sets. We believe that this experience and track record of our Directors in diesel generators has been key to developing our brand.

3. Strong technical and execution capabilities

We believe that our sufficient equipment base, qualified and experienced employees, implemented systems, procedures and capabilities enable us to supply quality diesel generator sets to meet the national standards.

4. Experienced and proven management team

Our qualified and experienced management team has been responsible for the growth in our operations. We are backed with a team of professionals. Mr. Mahendra Madhairam Shaw, one of the Executive Directors of our Company, is having rich experience of over three decades in the field of diesel generator sets and supply of spare parts and has been the guiding force behind the successful execution of our business strategies over the years. Mr. Sourabh Mahendra Shaw, our Promoter, has experience of around 10 years in the business of diesel generator sets and under his leadership the Company has been expanding business into international market. We believe we have a strong and experienced senior management team. Through their commitment and experience, our management team has helped us to grow our business and maintain high productivity.

OUR STRATEGIES

We intend to pursue the following principal strategies to optimize our competitive strengths and grow our business:

1. Capitalize on continued demand for generator sets

We believe that anticipated economic growth, lack of stable power supply, energy deficits, growing demand for backup power and inadequate power infrastructure may continue to lead to greater demand for generator sets in India. We believe that the diesel generators market in India is expected to grow over the next few years, primarily due to the establishment of industrial parks, petroleum, chemicals and petrochemical investment regions, increasing the emphasis by the government on infrastructure projects such as metro rails, smart cities, the expansion of state and national highways and investments in the IT/ ITeS (especially data centre capacity). All these will lead to an increase in the demand for our products. Our generator sets business would be ideally placed to cater to such demand for reliable and consistent back-up power. Our generator sets can also serve as primary sources of power in remote or outdoor locations that are not connected or have limited access to the electricity grid, such as construction sites, railways, mining, quarrying and oil and gas operations. We can leverage our existing facilities to meet higher demand by operating in multiple shifts.

2. **Expand our reach in the international markets**

We export a variety of DG Sets which utilize engines of our dealers to countries in Middle East, South East Asia and Africa. We believe that there is a good potential for the Indian exporters to export DG Sets to Africa and neighbouring countries in Asia. Further, we believe that exporting to such countries may nullify the impact of any downward demand in the domestic market.

3. **Continue to develop client relationship and expand our client base**

We plan to grow our business primarily by increasing the number of clients and retaining the existing client base, as we believe that increased client relationships will add stability to our Business. We intend to retain existing relationships and also focus on bringing new clients into our portfolio. Our Company believes that our business is a by-product of relationship maintained with our clients and try to maintain long-term relationship with our clients. Long-term relations are built on trust and continuous meeting with the requirements of the clients. We believe that our continuous relationship with clients will provide us with an opportunity to improve our capabilities to offer better products and services in our diesel generators business. We also intend to continue to pursue alliances that may provide us with greater access to advanced technologies and allow us to diversify our product and customer base in India.

SALES AND MARKETING

Marketing strategy of our Company is substantially dependent on the past credentials and track record, which includes quality of services. We also enter into dealership arrangements with third parties from time to time for the export of our DG Sets to overseas customers. We sell our DG Sets to industrial and corporate end-users in a number of customer segments.

QUALITY CONRTOL

A good quality product is the foundation for a good brand. We believe that consistency of quality products can only be achieved by process orientation.

We have functional team who takes care of quality checks in the inspection process right from procurement of materials, assembling process to final delivery. We focus on upgrading our skills, quality system, infrastructure and facilities to achieve consistent product quality and customer satisfaction.

RAW MATERIALS

Our major raw materials comprise engine and alternators which constitutes a substantial portion of the overall value of the generator set. We procure engine from our suppliers. We procure alternator, copper, acoustics, fuel tank rubber, switchgear, control panels and other electrical components from other vendors.

COMPETITION

We face competition in our business. Our DG Set business competes across a number of factors, such as size of the generator unit, location of the project, customization needs of the customer and our previous relationship with the customer. Because we operate in specified geographies, our competition also depends on the relative advantage of our competitors in these identified geographies. We also face competition from regional established players in domestic market. For further details, see “*Industry Overview*” beginning on page 81 .

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Revenue from Operation

Revenue from operations has decreased by 50.89%, from Rs. 4217.18 lakhs in Fiscal 2020 to Rs. 2070.95 lakhs in Fiscal 2021. The decrease in revenue from operations as compared to last year is due to outbreak of Covid -19 which has been affected our domestic and export business.

In fiscal 2019-20, we had entered into new business vertical of trading in TATA commercial vehicles spares parts. We are the authorized distributor of commercial vehicle spare parts to Maharashtra State Road Transport Corporation (MSRTC) a State Government entity and Pune Mahanagar Parivahan Mahamandal Limited (PMPML) organizations run by Municipal Corporation of Pune. Due to Covid-19, most of the busses of MSRTC and PMPML were not running and therefore requirement of the spare parts was negligible, which resulted into decrease in the turnover.

Other Income

Other Income has decreased by 82.36%, from Rs. 117.86 lakhs in Fiscal 2020 to Rs. 20.79 lakhs in Fiscal 2021. In Fiscal 2020, the major part of other income was 1) Foreign Currency Fluctuation gain and Duty Drawback. In Fiscal 2021, the spread of currency fluctuation between USD and INR was

very less as compare to the Fiscal 2020, therefore, there is reduction in Other Income. Due to pandemic, global business was at halt and we were not the exception to that and our export business was adversely affected and no major export consignment could be sold as a result, earning from duty drawback has reduced.

Employee Benefit Expenses

Employee Benefit Expenses had been decreased by 26.41%, from Rs. 104.54 lakhs in Fiscal 2020 to Rs. 76.93 lakhs in Fiscal 2021. This decrease is due to Covid-19 pandemic and lockdown in the country as there was suspension of business which resulted into decrease in these expenses.

Finance Cost

Finance Cost has decreased by 5.17% from Rs. 222.87 lakhs in Fiscal 2020 to Rs. 211.36 lakhs in Fiscal 2021. This is due to low working capital rotation cycle in the lockdown and hence interest expenses were reduced.

Depreciation and Amortization Expenses

Depreciation had decreased by 21.57%, from Rs. 7.17 lakhs in Fiscal 2020 to Rs. 5.62 lakhs in Fiscal 2021 as the Company follows WDV method of depreciation and no major fixed assets addition happened during FY 20-21.

In Fiscal 2020, the major part of the Other Expenses was expenses related to the installation and Sales activities. In Fiscal 2021, as the Revenue from Operations has reduced due to Covid-19, therefore, Other Expenses reduced a lot when compared to Fiscal 2020.

Tax Expenses

The Tax Expenses had decreased by 72.00% from Rs. 56.71 lakhs in Fiscal 2020 to Rs.15.88 lakhs in Fiscal 2021. This is primarily due to decrease in Profit Before Tax on account of lower Revenue from Operations due to Covid-19.

Profit after Tax

After accounting for taxes at applicable rates, the Profit after Tax had decreased by 94.66% from Rs. 168.57 lakhs in Fiscal 2020 to Rs. 9.00 lakhs in Fiscal 2021 as our operations affected adversely on account of Covid-19 in Fiscal 2021 and due to result of all collective reasons stated above.

Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Applicants into the UPI mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is governed by the provisions of the FEMA Rules. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP makes policy announcements on FDI through press notes and press releases. In case of any conflict, the FEMA Rules prevail. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The consolidated FDI policy circular of 2017, dated August 28, 2017 issued by the DIPP (“FDI Circular”) consolidates the policy framework which was in force as on August 28, 2017 and reflects the FDI Policy as on August 28, 2017. Further, the FDI Circular consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP. As per the FDI Circular the cap for foreign investment in our industry, is 100% under the automatic route. However, downstream investments by a resident entity which is ‘foreign-owned and controlled’ within the meaning of the FDI Circular are treated as foreign investment for the purposes of the FDI Circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI or any other relevant authority, provided that (i) the activities of the investee company are under the automatic route under the FDI Circular and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Circular; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI and RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, or any state securities laws in the United States, and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws in the United States. Accordingly, the Equity Shares are being offered only outside the United States in offshore transactions in compliance with Regulation S under the Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors cannot offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriter and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them and do not exceed the applicable limits under the laws and regulations.
